

When we execute code that time it redirect on index in page index page I have mention registration page code

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/webapp5/index.jsp'. The page content is a registration form titled 'Registration'. The form contains three input fields: 'Name:' with the value 'Ganesh', 'Email:' with the value 'ganesh@gmail.com', and 'Password:' with the value 'Daradei'. Below the password field is a 'Register' button. The browser's taskbar at the bottom shows the Windows logo, a search bar, and several application icons. The system tray on the right indicates a temperature of 31°C, sunny weather, and the time 7:11 AM on 4/16/2024.

When we not provide value in registration page and try to redirect on login page it give like below message

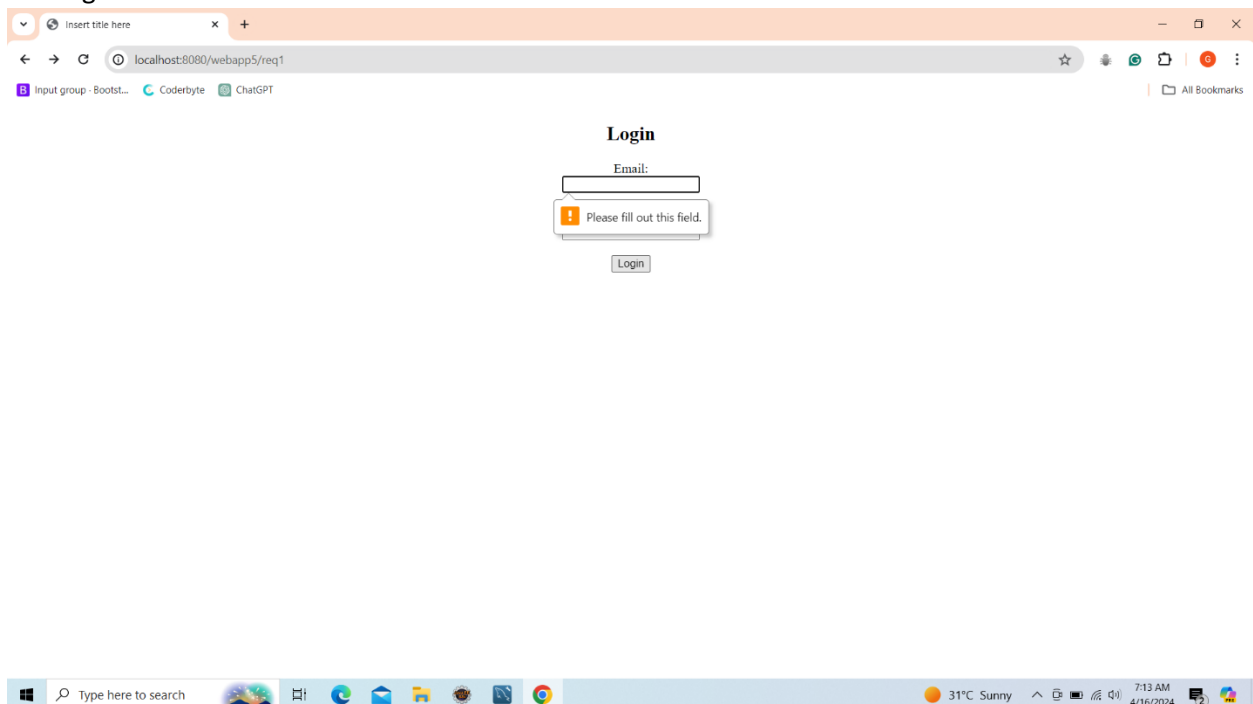

The screenshot shows the same web browser window as before, but with a validation message. A yellow box with an orange exclamation mark icon is overlaid on the 'Name:' input field, containing the text 'Please fill out this field.' The other fields and the 'Register' button remain visible. The browser's taskbar and system tray are identical to the previous screenshot.

After redirect on login page we need to add email and password which you mention in registration if it is match then it redirect on next page otherwise it redirect on error page

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/webapp5/req1'. The page title is 'Login'. The form contains an 'Email:' field with the value 'ganesh@gmail.com' and a 'Password:' field with masked characters '\*\*\*\*\*'. A 'Login' button is located below the password field. The browser's taskbar at the bottom shows the Windows logo, a search bar, and several application icons. The system tray on the right indicates a temperature of 31°C, sunny weather, and the time 7:12 AM on 4/16/2024.

We require add details in login page if we don't add anything it will not redirect on next and give below message

The screenshot shows the same web browser window as before, but the 'Email:' field is empty. A red error message box with an exclamation mark icon is displayed below the email field, containing the text 'Please fill out this field.'. The 'Login' button remains visible below the password field. The browser's taskbar and system tray are identical to the previous screenshot.

After login we redirect on add employee details page where we can add details of employee after filling details when we click on add button then inserted value will be stored in database

Below images are database images where we can able to see our records which we inserted in registration and add employee details page
